Cleaning of clamps after use:

Cleaning:

- Clamps should be rinsed & cleaned immediately after the procedure
- Failure to clean will decrease the life of clamp & can result in staining & corroding
- Rinse & remove excess material before ultrasonic cleaning

Allow clamps to dry

Sterilization: Important to remove excess restorative material from the clamp before sterilization as it may damage the clamp

Autoclave – 15 min at 130°C/266°F

Inspect the clamp for wear, distortion or damage

Discard if distorted
