DEPARTMENT OF PUBLIC HEALTHDENTISTRY

AWARENESS ON PREVENTIVE ORAL HEALTH AND ORAL
SCREENING CAMP

TIME: 9.00 PM -1.30 PM

DATE: 4.9.2021

LOCATION: AGARAM VILLAGE, NELLIKUPAM, THIRUPORUR

STAFF ATTENDED: Dr.Nagaland .T

POSTGRADUATE ATTENDED: D.Charumathi

INTERNS ATTENDED: Adithi.K

Chandni.S

SUMMARY:

According to Census 2011 information the location code or village code of Agaram village is 629438. Agaram village is located in Chengalpattu Tehsil of Kancheepuram district in Tamil Nadu, India. Kancheepuram and Chengalpattu are the district & sub-district headquarters of Agaram village respectively. As per 2009 stats, Nellikupam is the gram panchayat of Agaram village.

The total geographical area of village is 252.64 hectares. Agaram has a total population of 408 peoples. There are about 108 houses in Agaram village. Thiruporur is nearest town to Agaram which is approximately 10km away.

- Total population: 408
- Male:218
- Female: 190

Multispeciality Medical Camp was conducted by Chettinad academy of research and education in agaram village on 4.9. 2021. We screened nearly 40 patients of which 4 are males, 34 are females. Most of the population screened were geriatric and had difficulty in mastication. Out of the 40 patients screened, 6 were partially edentulous, 3 had dental caries, 18 of them had generalised periodontitis, 7 of

them had generalized gingivitis, 4 of them had habit of tobacco chewing and 3 of them had chronic irreversible pulpitis. We screened for nearly 34 hours and medications were given for patients. Patients were guided to have treatment in chettinad dental college and research institute. Health education was given to patients with typho model about method, frequency of brushing and its significance.

AWARENESS ON ORAL HEALTH AND DENTAL SCREENING CAMP

Date: 18.09.2021

Venue: Vettuvankeni

Time: 10:00a.m.-2:30p.m.

Intern: Anusha R

Summary:

Among several specialties involved in the camp such as Ophthalmology, ENT, Pediatrics and Orthopedics, the Department of Public Health Dentistry was included to represent the dental specialty. The activities primarily involved dental screening and oral health education. Dental screening was performed to look for common oral conditions such as dental caries, edentulism, wasting diseases of the teeth and mobility. Mass oral health education was provided by the interns on seeking regular dental care and oral hygiene instructions. From the patient census, it was evident that the population that underwent dental screening was predominantly females, with periodontitis being the most common oral condition. The patients was encouraged to visit the Department of Public Health Dentistry to seek the desired treatment at no cost.

AWARENESS ON ORAL CANCER AND DENTAL SCREENING CAMP

Date: 10.10.21	Organizer: TVH Ouranya Bay Apartment
Venue: TVH Ouranya Bay Apartment, Kazhipattur	No. of students attended: 5
Faculty present: Dr. Cyril Benedict	Interns present: Aamina Adithi Akshayaa Achshah Agalya

PATIENT CENSUS:

Total	Male	Female
33	19	14

Partially edentulous	3
Dental caries	7
Gingivitis	14
Periodontitis	4
Others	5

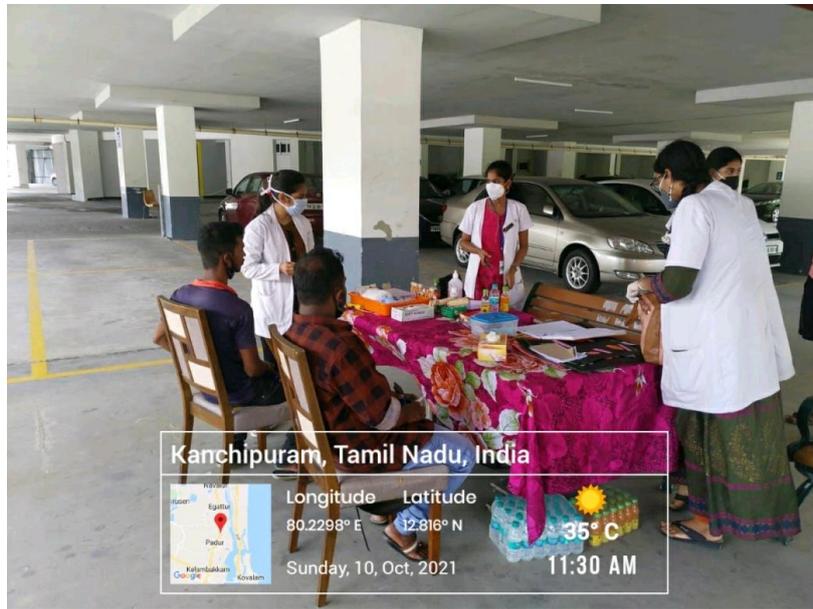

SUMMARY:

The dental camp was conducted in a residential area with multiple inhabitants, thereby, broadening our reach to the target population. The target population comprised of literate individuals. A total of 33 patients were screened for commonly seen oral conditions such as edentulism, gingivitis, periodontitis, dental caries and non-cariou lesions. Dental biofilm induced gingivitis was the most seen oral condition among the patients. A rare case of mucocele of the lower lip was seen. Treatment modalities for the same were discussed. According to the oral conditions seen, customised health education was provided to the patients, covering the fields of: Oral hygiene aids, influence of oral health on systemic health, the importance of nutrition in the overall well-being of an individual. Through this wholesome experience, we developed the skills of team work, multi-tasking, assurance of quality communication and work delegation.

AWARENESS CAMP ON PREVENTIVE ORAL HEALTH AND DENTAL SCREENING CAMP

Date: 11.10.21	Organizer: Shri Sairam Old Age Home
Venue: Shri Sairam Old Age Home, Urapakkam	No. of students attended: 4
Faculty present: Dr. Jagannatha	Interns present: <u>B batch</u> <ul style="list-style-type: none"> • Aamina • Adithi • Akshayaa Post graduate present: <ul style="list-style-type: none"> • Dr. Charumathi

PATIENT CENSUS:

Total	Male	Female
19	8	11

Edentulism	10
Dental caries	4
Gingivitis	Nil
Periodontitis	4
Others	1

SUMMARY:

The dental screening camp was conducted in a remote old age home in Urapakkam, inhabited by 20 residents. A total of 19 patients were screened for commonly seen oral conditions such as edentulism, gingivitis, periodontitis, dental caries and non-carious lesions. Edentulism was the most seen oral condition among the patients. Treatment modalities and consequences of postponing the same were discussed. According to the oral conditions seen, customised health education was provided to the patients, covering the fields of: Oral hygiene aids, influence of oral health on systemic health, the importance of nutrition in the overall well-being of an individual. Given the number of denture-wearers, the target population was educated on denture hygiene and various denture cleansing aids. Through this wholesome experience, we developed the skills of empathy, teamwork, multi-tasking, assurance of quality communication and work delegation.

AWARENESS ON WOMEN EMPOWERMENT AND DENTAL SCREENING CAMP

Date: 13.10.21	Organizer: Myrtle Women's Shelter
Venue: Myrtle Women's Shelter, T.T.K. Road, Alwarpet	No. of students attended: 3
Faculty present: Dr. Vidhya G.	Interns present: <u>B batch</u> <ul style="list-style-type: none"> • Aamina • Adithi • Akshayaa

PATIENT CENSUS:

Total	Male	Female
20	0	20

Edentulism	3
Dental caries	10
Gingivitis	2
Periodontitis	4
Others	1

SUMMARY:

The dental screening camp was conducted in a Women's Shelter in Teynampet, inhabited by 16 residents. A total of 19 patients, comprising of 2 paediatric patients, 14 adult patients and 3 volunteers were screened for commonly seen oral conditions such as edentulism, gingivitis, periodontitis, dental caries and non-carious lesions. Dental caries was the most seen oral condition among the patients. Treatment modalities and consequences of postponing the same were discussed. According to the oral conditions seen, customised health education was provided to the patients, covering the fields of: Oral hygiene aids, influence of oral health on systemic health, the importance of nutrition in the overall well-being of an individual. The role of fluorides in toothpastes was explained to those who resorted to the use of ayurvedic counterparts. Given the number of women residents, the importance of menstrual hygiene and consumption of iron rich food was emphasized upon. To commemorate Global Handwashing Day, the residents were educated on the importance of handwashing, the key times to wash hands and the steps involved in handwashing. The ideal handwashing technique was also demonstrated to the public. The difference between using a sanitizer and handwashing liquid was explained. Through this wholesome experience, we developed the skills of empathy, teamwork, multi-tasking, assurance of quality communication and work delegation.

Summary:

We, Poonjeri interns conducted a Dental Screening Camp on 24th October 2021. On this day on receiving a request from an orphanage located at perumbakkam, we set out to conduct a dental screening camp in the aim of benefiting the several abandoned children and the caretakers of the children's trust. There we performed dental screening on the children and adults with various age groups. The screening was carried out to look for common oral health conditions like Dental caries, edentualism, mobility, malocclusion and other gingival conditions. We educated the children and adults about the general information on the importance of oral hygiene and how good daily habits contribute to change in a person's life. The Modified Stillmans brushing technique and oral hygiene instructions were taught to them using models. The children were very much intrigued and enthusiastic throughout the program and were inquisitive on learning the new methods to maintain their oral health. Tooth brushes and tooth pastes were handed out to the children to aid in maintaining their oral hygiene. The management was happy with the program and encouraged us on the successful event.

Summary:

We, Poonjeri interns conducted a Dental Screening Camp on 02, NOVEMBER 2021. On this day on receiving a request from the college located at KAZHIPATTUR, we set out to conduct a dental screening camp in the aim of benefiting the several students and staffs at the college. we performed dental screening on the students and staffs with various age groups. The screening was carried out to look for common oral health conditions like Dental caries, edentualism, mobility, malocclusion and other gingival conditions. We educated the students and staff about the general information on the importance of oral hygiene and how good daily habits contributes to change in a person's life. The Modified Stillmans brushing technique and oral hygiene instructions were taught to them using models. The students were very much intrigued and enthusiastic throughout the program and were inquisitive on learning the new methods to maintain their oral health. The management was happy with the program and encouraged us on the successful event.

AWARENESS ON ORAL HEALTH AND DENTAL SCREENING
CAMP-PUMS SCHOOL, MULLIKOLATHUR

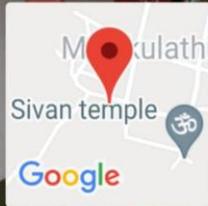

DATE-14.12.2021	VENUE-PUMS SCHOOL, MULLIKOLATHUR
FACULTY-Dr.NAGALAND	ORGANIZER-PUMS SCHOOL, MULLIKOLATHUR
NO OF STUDENTS ATTENDED-6	SRUTHI.S SOWMYA.N SUBAKEERTHI.T SUREKA.K.V SURYA.N SUBASHINI.N

Summary:

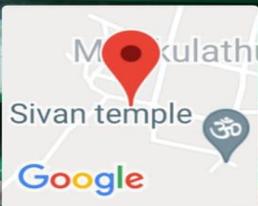

The activities primarily involved were dental screening which was performed to look for common oral conditions like dental caries, , fractured tooth and other gingival and periodontal conditions. Oral health education which was provided by us to all the children and staff with the help of models and charts and brushing techniques were demonstrated. The students were very much interested in learning to maintain their oral health. Initially, a talk was given to the students about the significance of oral hygiene maintenance and the various ways to prevent dental problems and they were explained in detail about brushing techniques and demonstrated on the same using tell show do technique. All the students were actively learning and the interaction was helpful for students to know about the right technique for tooth brushing and the right oral hygiene aid to use. The screening camp helped every student to make them aware of their dental problem. At the end of the day, the students were highly motivated to maintain a good oral hygiene. We made charts, batches, pamphlets on NATIONAL HANDWASHING DAY which is done to create awareness among students and public about importance of handwashing .we also educated them with proper handwashing technique and made them to volunteer to do the same .We also explained the importance of handwashing and made them aware of the importance of handwashing. The patients were encouraged to visit the Department of Public Health Dentistry to seek the desired treatment at no cost.

DENTAL HYGIENE AWARENESS AND ORAL HYGIENE CAMP

TIME: 9.30 AM -2.30 PM

DATE: 18.12.2021

LOCATION: Vadakadambadi, Mahabalipuram

CAMP- Public Screening Camp

ORGANISERS: Vadakadambad

STAFF ATTENDED: Dr. Parvathy Thampy P.S

POSTGRADUATES ATTENDED: 1. Vincy Preetha. S

2. Sujatha Devi. B.K

SUMMARY:

PLACE:

Vadakadambadi village is located in India and listed under Taluk: Tirukalikundram, in the district of Kanchipuram, Tamil Nadu State. It is located 54 KM towards East from District headquarters Kanchipuram. 63 KM from State capital Chennai Vadakadambadi Pin code is 603104 and postal head office is Mamallapuram. Vadakadambadi is surrounded by Chengalpattu Taluk towards North, Lathur Taluk towards South, Thiruporur Taluk towards East, Madurantakam Taluk towards west. It is near to Bay of Bengal. There is a chance of humidity in the weather. Tamil And English is the Local Language here. Otivakkam Rail Way Station are the very nearby railway stations to Vadakadambadi. Government health centres near Vadakadambadi:

- 1) KR Hospital, 45-A, Mosque Street,
- 2) St. Mary's Hospital, 823, Rice Mill Street,
- 3) Sri Sathya Sai Medical College, 1, Guduvancherry Main Road, Near Thiruporur

CAMP SUMMARY:

Multispeciality Camp was conducted by Chettinad Academy of Research and Education at Vadakadambadi, Mahabalipuram on 20.12.2021. We screened 31 patients with various dental complaints and had given them appropriate treatment plan and gave referral to our department at the Chettinad Dental College & Research Institute with the screened OP sheet and the Rural Health Centre at Poonjeri. Patient with symptomatic complaints were prescribed medications. Oral Hygiene instructions was given to all the patients generally and specific to their history. Patients with increased Casual Blood Glucose value and Increased Blood Pressure that was screened at the camp were also advised on taking appropriate treatment for glycemc and Blood Pressure control before attending dental treatments and its relationship was explained with pictures after which they were referred for the general medicine screening. Pediatric patients were taught brushing techniques and dietary sugar control counselling was given to them and their guardians/parents. Tobacco chewers were given awareness about the ill-effects of continuing the habit both to their body and oral cavity and given counselling and referred to our Tobacco Cessation Centre at our department. Special cases screened were Early Childhood Caries, Anemic glossitis, Healing Alveolar osteitis for which symptomatic treatment was advised and their implications on the patient's oral hygiene maintenance status was explained.

CENSUS:

Total- 31

Male-11

Female-20

Above 50 years of age- 12

DIAGNOSIS:

Dental caries-12

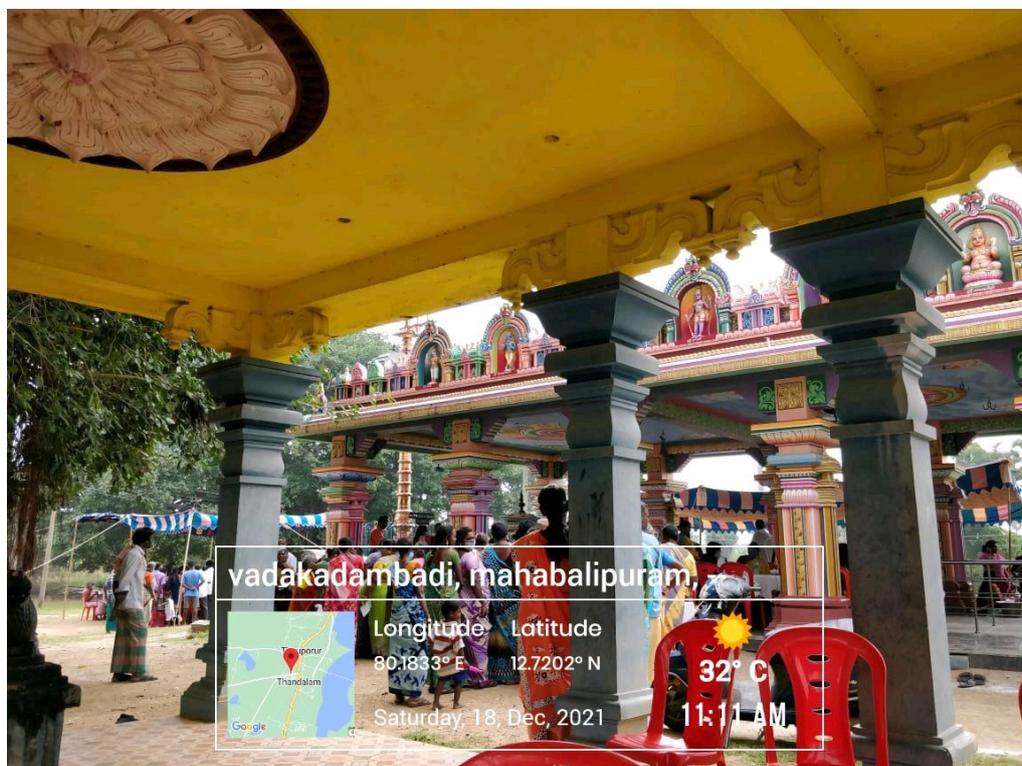

Periodontitis- 9

Others-9

INFERENCE:

The Smokeless Tobacco Chewers incidence was higher among the screened population equal among the males and females, as most of the screened were geriatric the incidence of diabetes with periodontitis was seen in more common. The usage of neem twigs instead of toothbrushes while at work was also seen among farm workers as most of them were farmers.

AWARENESS ON ORAL HEALTH AND DENTAL SCREENING
CAMP-MIDDLE SCHOOL, KARIYENCHERI

DATE-23.12.2021	VENUE-MIDDLE SCHOOL, KARIYENCHERI
FACULTY-Dr.VIDYA	ORGANIZER-MIDDLE SCHOOL, KARIYENCHERI
NO OF STUDENTS ATTENDED-6	SOWMYA.N SRUTHI.S SUBAKEERTHI.T SUBASHINI.N SUREKA.K.V SURYA.N

Summary:

DETAILS OF THE SCREENING CAMP CONDUCTED:

Dental screening was performed to look for common oral conditions like dental caries, fractured tooth and other gingival conditions. Oral health education was provided by us to all the children and staffs and parents with the help of models and charts, presentations and brushing techniques were demonstrated. They were very much interested in learning to maintain their oral health.

INSIGHT TO THE CAMP CONDUCTED:

Gingivitis was the most common condition noted. This was followed by dental caries. It was an interactive session where we first started an introduction to oral health and ways of maintaining oral health we explained the children regarding the importance of correct tooth brushing method, what kind of oral hygiene aids to use and the frequency of brushing teeth.

We also explained them about interdental aids like floss and interdental brush and how to use them regularly.

We explained them with the help of our charts, model and videos. They were interested in learning the correct brushing and flossing technique. We received feedback from the children and clarified their doubts. The children were explained in detail about dental caries its formation, progression and effective ways to prevent it.

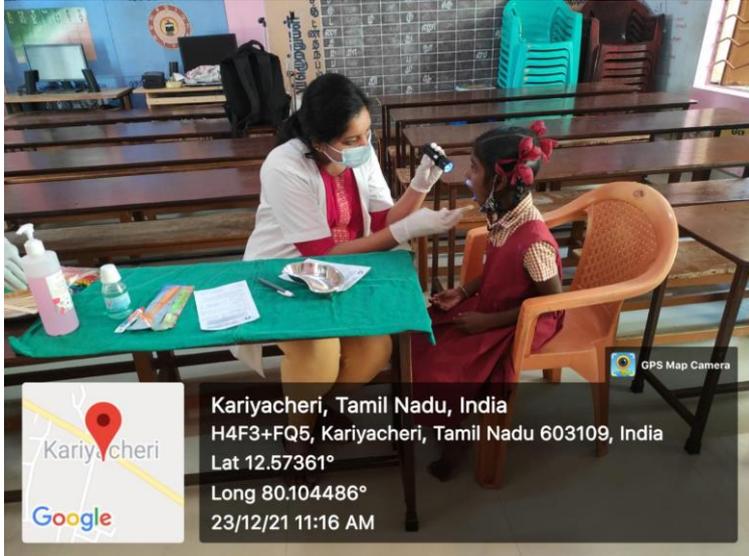

WHAT WE LEARNT:

We learnt that children in the age of 5-11 years are the most significant age group to educate because their acceptance and enthusiasm levels are high to learn new things and adapt them in their day-to-day life. Their curiosity to gain knowledge was at its peak.

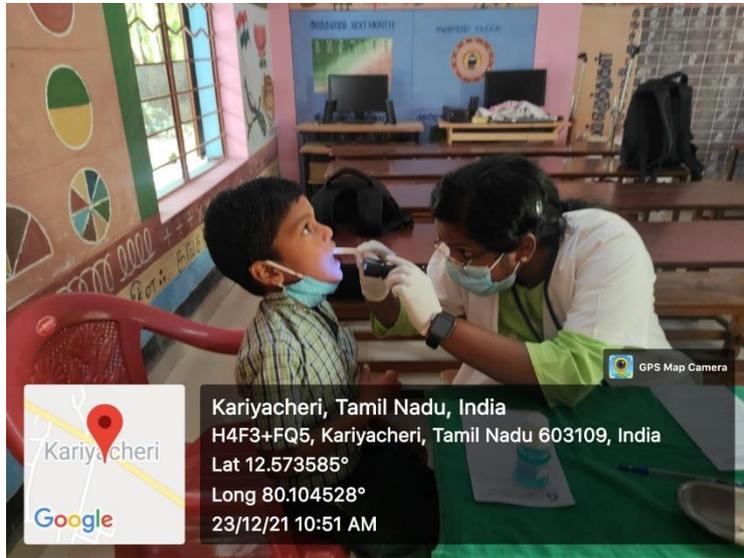

This made us realise that reaching the kids in their early life can act as a milestone for development of best oral health practices.

DENTAL HYGIENE AWARENESS AND DENTAL SCREENING CAMP- PUM SCHOOL MANNIVAKKAM

DATE:12.02.2022	VENUE: PUM School, Mannivakkam, Katankolathur.
FACULTY:DR.CYRIL BENEDICT	ORGANISING AGENCY: PUM School
NUMBER OF STUDENTS ATTENDED:2	NUMBER OF PATIENTS SCREENED:21

SUMMARY:

The camp was organized by CARE (Chettinad Academy of Research and Education). The activities primarily involved dental screening and oral health education to the children and the people of that locality (Mannivakkam). Dental screening was performed to look for common oral conditions such as Dental caries, gingivitis and mobility. Mass oral health education was provided by the interns on seeking regular dental care. From the patient census, it was evident that the population that underwent dental screening were predominantly males, with Dental caries being the most common oral condition. The students and the people were encouraged to visit the department of public health dentistry to seek the desired treatment at no cost.

**AWARENESS ON TOBACCO CONSUMPTION AND DENTAL
SCREENING CAMP – ORAGADAM**

Date : 05.03.2022	Venue : Oragadam
Faculty : Dr.Nagaland	Organising agency: Oragadam
No. of students attended :2	1)H .Pavithra 2)Pavithra Rathinaswamy

We, Karappakkam interns (H.Pavithra and Pavithra Rathinaswamy) along with Dr.Nagaland sir participated in awareness on tobacco and free dental screening camp organized by Chettinad health city CARE at Oragadam village on 05.03.2022 from 10.30 am to 1.30 pm. 42 patients of ages between 26 and 85 got screened. Many patients were already aware of their oral problems and had history of smoking, chewing and pouching smokeless tobacco. Awareness on oral hygiene and tobacco were still at primary level in that village. People were educated about oral hygiene maintenance and various dental treatment options. Health education was given using health education book, pamphlets and tooth model. This camp helped us to know the lack of oral health facilities provided to the remote villages and the significance of oral health education among those people.

Common intra-oral findings were:

- 1) Chronic generalised periodontitis
- 2) Tobacco stains

HIV AWARENESS PROGRAM AND DENTAL SCREENING CAMP
TVS CONSTRUCTION – KOLAPAKKAM

Date : 05.03.2022	Venue : KOLAPAKKAM
Faculty : Dr.Jagannatha	Organising agency: District AIDS control society.
No .of students attended : 5	K.V.LAKSHIKA SREE R.LALITHA M.LAKSHMI PRIYA MAHA SRINITHI MEGHANA

As a part of activities in Department of Public Health Dentistry, we participated in free dental screening camp organized in Kolapakkam. There were about 101 patients who got screened of mixed age from 18 to 70 years. Oral hygiene awareness is still at primary level with these people. Even though there was generalized acknowledgement of having regular dental visits is good for them, they are still hesitant to do, mainly because of myths among them. Health education was given using health education book, tooth model. People were educated about various treatment options and oral hygiene maintenance. Many were already aware of their oral problems and had history of chewing paan or Hans. This camp enlightened us about other side of poor society & importance of health education among those peoples.

Common findings:

- Dental caries,
- Chronic generalized periodontitis

Male Population -21824
Female Population -20071

The locality Kotturpuram falls in Chennai district situated in Tamil Nadu state, with a population of 41895. The male and female populations are 21824 and 20071 respectively. The size of the area is about 2.74 square kilometers.

Mrs. Deepika mam educated us about how to enquire the people in kotturpuram about their tobacco usage history, aids given in Adyar tobacco cessation clinic, the effect of passive smoking and second hand and third-hand smoking and its effect on the environment.

Total Tobacco users identified -39

Males- 25

Females- 14

These people were enquired about their habit of tobacco and alcohol. They were educated about tobacco and its ill effects. Some of them were willing to quit the habit while others had some reluctance to quit the habit. Most of the tobacco users gave their phone numbers for correspondence as a part of counseling.

Kotturpuram door to door screening of tobacco users at Chitra street 1 and 2

Males at street shops were enquired about their tobacco use history and were referred to Adyar cancer institute for free counseling and they were informed about the oral screening camp to be conducted by both Adyar cancer institute and Chettinad dental college in the upcoming weeks. 39 persons were found to be tobacco users in the area where 25 were male and 14 were

female. Females were tobacco and betel leaves and areca nut chewers. Women of that community were more ready for getting counseled rather than men

**ORAL HEALTH AWARENESS AND DENTAL SCREENING CAMP –
VELAMMAL VIDYALAYA SCHOOL**

DATE: 08.03.2022	VENUE: VELAMMAL VIDYALAYA, AYANAMBAKKAM
FACULTY: DR. PARVATHY THAMPY	ORGANIZING AGENCY: VELAMMAL VIDYALAYA AYANAMBAKKAM
INTERNS ATTENDED:	NEHRTHIKA SOWMYA VISHNU KUMAR

Summary:

The camp was organised by the **Department of Public Health Dentistry, CDCRI**. The activities primarily involved were **dental screening and oral health education** to the **Velammal Vidyalaya faculty as part of Women's Day Celebration**.

Dental screening was performed to look for common oral conditions such as dental caries, periodontal problems, edentulism and wasting diseases of the teeth. Mass oral health education was provided and the queries were answered by the interns on seeking regular dental care.

From the patient census, it was evident that the population that underwent dental screening was predominantly **adult females**, with **dental caries** and **gingivitis** being the most common oral condition. The patients were encouraged to visit the Department of Public Health Dentistry to seek the desired treatment at no cost.

AWARENESS PROGRAM ON TOBACCO CONSUMPTION AND DENTAL SCREENING CAMP- DLF CONSTRUCTIONS -THARAMANI

Date : 09.03.2022	Venue :DLF CONSTRUCTIONS
Faculty : Dr.NAGAPPAN	Organizing agency:DLF CONSTRUCTIONS
No .of students attended : 4	S.MADHU BALA LOGESH RAM PAVITHRA LAKSHMI PAVITHRA RAJKUMAR

As a part of activities in Public health Dentistry department, we participated in free dental screening camp organized in DLF constructions, THARAMANI. There were about 45 got screened of mixed age from 28 to 45 years. Oral hygiene awareness is still at primary level among workers. Even though there was generalized acknowledgement of having regular dental visits is good for them, they are still hesitant to do, mainly because of myths among them. Health education was given using health education book, tooth model. People were educated about various treatment options and oral hygiene maintenance. Many were already aware of their oral problems and had history of chewing paan or Hans. This camp enlightened us about other side of poor society & importance of health education among those peoples.

Common findings:

- dental caries,
- chronic generalized periodontitis,
- partially edentulous arch,
- Generalised attrition.

PLANTATION AWARENESS AND DENTAL SCREENING CAMP -
KAZHIPATUR

DATE:24.03.2022	VENUE: PANCHAYAT UNION MIDDLE SCHOOL, KAZHIPATUR
FACULTY: DR. JAGANNATHA	ORGANISING: PANCHAYAT UNION MIDDLE SCHOOL
NUMBER OF STUDENTS ATTENDED: 9 1.DEEPIKA.R.M 2.GAUTHAM.B 3.GOWTHAM.P.D 4.HARISH.P 5.HEMALATHA.S 6.JAYAKUMAR.P 7.JAYABALAN.C.M 8.PRABAVATHI 9.PAVITHRA RATHNASAMY	NUMBER OF PATIENTS SCREENED :129 MALE-75 FEMALE-54 Common oral conditions seen: 1.dental caries 2.dental plaque induced gingivitis 3.chronic generalized periodontitis 4.malocclusion

SUMMARY:

We the D batch students organized a FREE DENTAL SCREENING CAMP at PANCHAYAT UNION MIDDLE SCHOOL, KAZHIPATUR. The activities primarily involved dental screening and oral health education to the children and the people of that locality (kazhipatur). Since most of them are children below 18 years. Dental screening was performed to look for common oral conditions such as Dental caries, gingivitis and malocclusion. Mass oral health education was provided by the interns on seeking regular dental care and we taught how to brush properly with the help of model to the people of that locality and explained about the oral hygiene. Also, we conducted a special event on world forest day which is celebrated on 21st march. We gave awareness among school children. We as a team made the people understand using charts, pamphlets and models and also, we explained about effects of deforestation. We cleared their confusions and doubts. On behalf of event, we conducted games and provided gifts and also, we planted a trees in the school campus. From the patient census, it was evident that the population that underwent dental screening were predominantly adults, with Dental caries being the most common oral condition. The patients were encouraged to visit the department of public health dentistry to seek the desired treatment at no cost

AWARENESS ON ORAL HEALTH AND DENTAL SCREENING
CAMP- PUDUPAKKAM

DATE:30.03.2022	VENUE: PUDUPAKKAM,KANCHIPURAM
FACULTY: DR. CYRIL	ORGANISING AGENCY: PUDUPAKKAM, KANCHIPURAM
NUMBER OF STUDENTS ATTENDED:4 1.RANJANI.T. S 2.SANTRA JOSEPH 3.YUVARANI 4.VIKRAMAN	NUMBER OF PEOPLE REACHED: 70

SUMMARY:

The camp was organized by CARE (Chettinad Academy of Research and Education) pudupakkam, Kanchipuram. The activities primarily involved GIVING AWARENESS OF COVID 19 VACCINE to the people of Pudupakkam village (houses, apartments, and shops). We educated the patients using charts and distributing pamphlets. We were divided into 4 groups and asked to give awareness in 4 different streets. We concluded that majority of the people were aware of the vaccine and they had taken the 2nd dose but they were unaware of the booster dose. This was our first experience in an outreach activity and we had a good time interacting with the people of pudupakkam village.

SUMMARY

The camp was organized by students of F-batch, CDCRI (Chettinad Dental College and Research Institute) Kelambakkam. An awareness program on oral health and free dental screening camp was conducted in

- GOVERNMENT HIGH SCHOOL, SIRUDHA VOOR

Under the supervision of Dr.JAGANNATHA sir. Dental screening was performed and common oral conditions were dental caries, dental plaque induced gingivitis, fractured teeth, chronic irreversible pulpitis. Preventive oral health technique was provided by us to all the students, teaching and non teaching staffs of the school with the help of models, charts, and presentations.

Total number of patients screened= 306 Students

The age group of general population examined was from 5 to 15 years which included male and female.

Many people of the population were diagnosed with dental caries , fractured tooth, dental plaque induced gingivitis and mal-alignment. All the Students were given demonstrations on brushing techniques and demonstrations on oral hygiene aids.

On this day , a special event was conducted on account of “**International Plastic free bag day**”. Awareness talks were given by the CRRIs individually to all the students, teachers and non teaching staffs on importance of eradication of single use plastics, microplastics and effects of plastic on air, soil, ocean and human life.

The objective of this event is to create awareness of oral health among school children.

Events conducted were 1) Distribution of pamphlets to students on “**Plastic vendame please!**” (daily using plastics and its alternative)

2)distribution of cloth bags to staffs.

The referral slips were given to all the patients after screening, stating the diagnosis and treatment plan. The hospital details were highlighted.
