Diagnostic and initial occlusal check

Assess the outline form: As far as possible small to moderate outlines are well suited for composites.

Check occlusal contacts: Keep margins away from these areas to minimise wear.

Isolation and pre-wedging

Isolation with Rubber dam is very critical. If this is not possible cotton rolls can be used along with saliva ejector.

Placing wedge interproximally at the start of the cavity preparation is recommended to open the contact with adjacent tooth.

Allows proper matricing and establishing good contact during insertion of composite restoration.

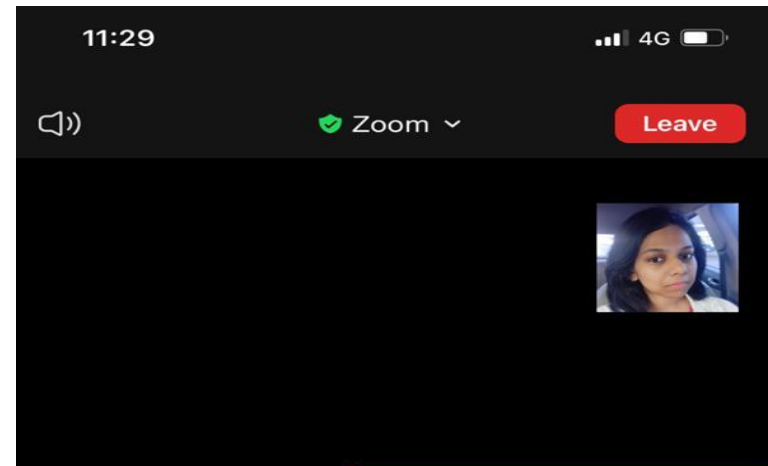

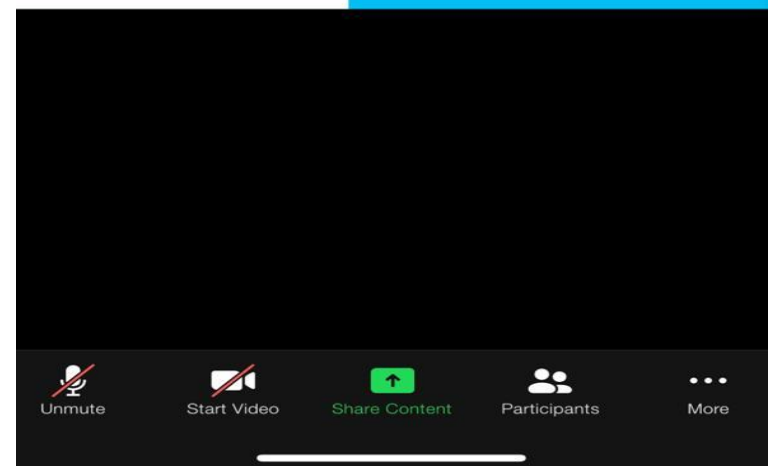

Fig 2 – Medium third: predominance of light reflection and little passage. That area, as a rule, should receive predominantly dentin material and a thinner enamel layer (0.5mm or less). Opaque material may be used for masking a darkened area.

1 Deep caries management

2

3 INDICATIONS

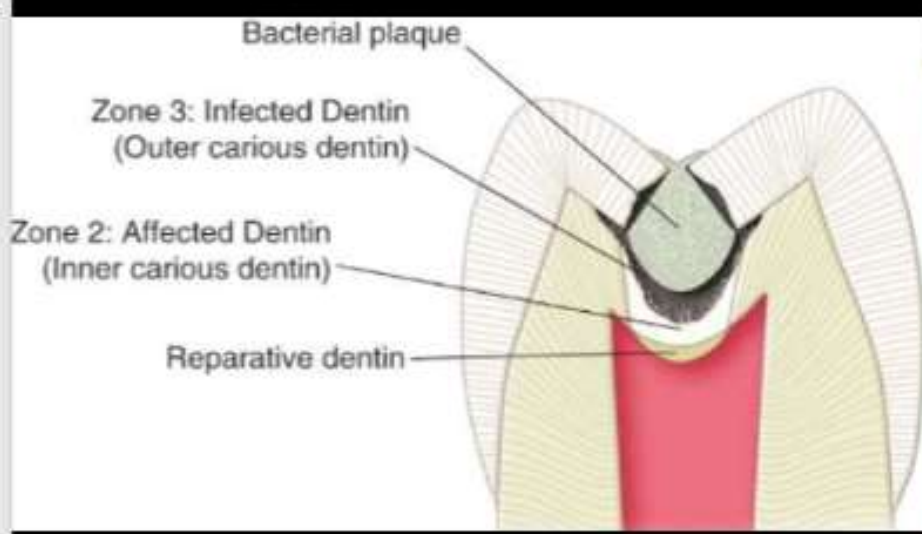

- Deep carious lesion
- Pulpal involvement
- Extensive caries
- Extensive pulpitis
- Extensive pulp necrosis
- Extensive pulpitis

4 CONTRAINDICATIONS

- Extensive pulpitis
- Extensive pulp necrosis
- Extensive pulpitis
- Extensive pulp necrosis

5

6

- Treating carious lesion close to a healthy pulp is significantly challenging.
- Adopting a minimally invasive approach will help avoid pulpal involvement.
- A selective caries removal prevents pulpal exposure.

A partial or selective caries removal

UG Presentation

Topic

White Spot Lesion and
Management

Staff:

Dr. Sadasiva. K

Dr. Anupama.R.

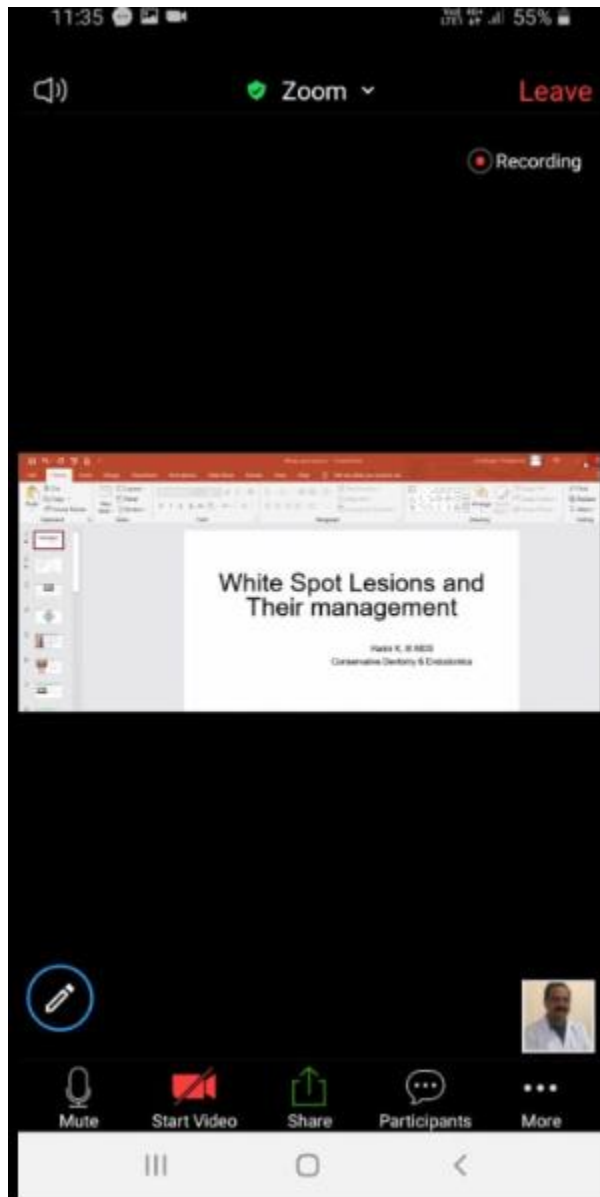

Dr. Manjiri Honap

Timings: 11.30 am to 12:10 pm
Sadasiva is inviting you to a scheduled Zoom meeting.

UG Presentation Time:
June 05,2020 11.30 AM.
Join Zoom meeting ID

<https://us04web.zoom.us/j/76882165699?pwd=eU1rVkhvRURBVEEx0cjVYQlpcME9uUT09>

No of Participants: 20

CONTENTS

White spot lesions - Definition

Etiology

Histopathology of white spot lesions

Incidence and Prevalence

Detection of white spot lesions

- Visual method
- Visual scoring system (ICDAS)
- Radiographic method
- Other methods

Diagnosis

- Lesion activity
- Risk assessment tool
- Risk based patient management

Prevention

- Fluoride agents
- Non fluoride agents

Management

- Non invasive treatment (Minimally invasive)
- Resin infiltration (Icon)
- Restorative treatment

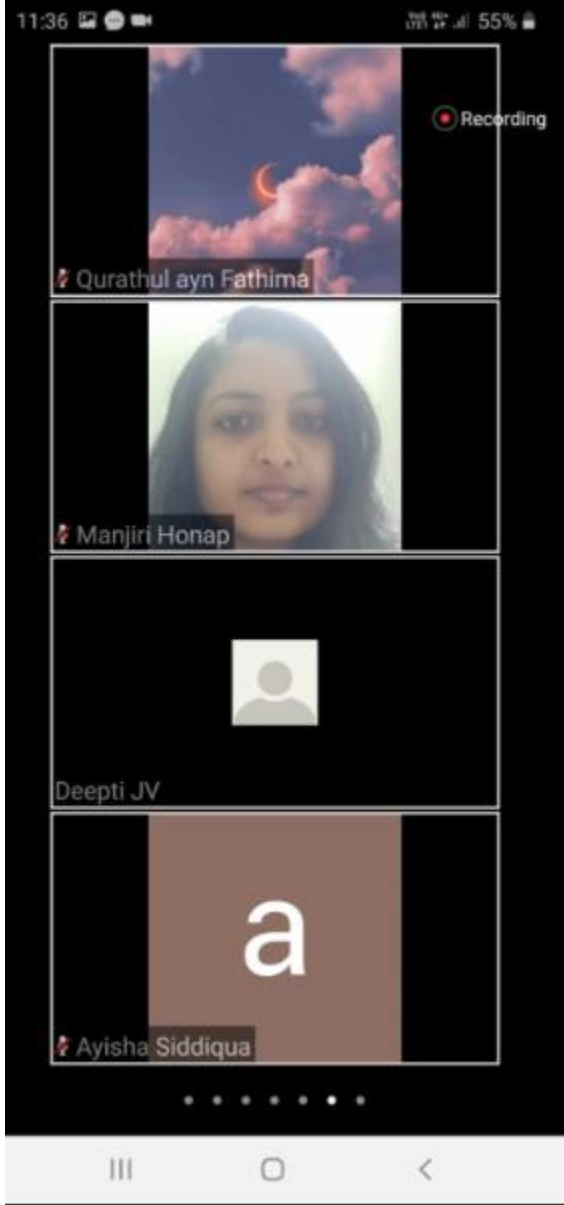

Maintenance

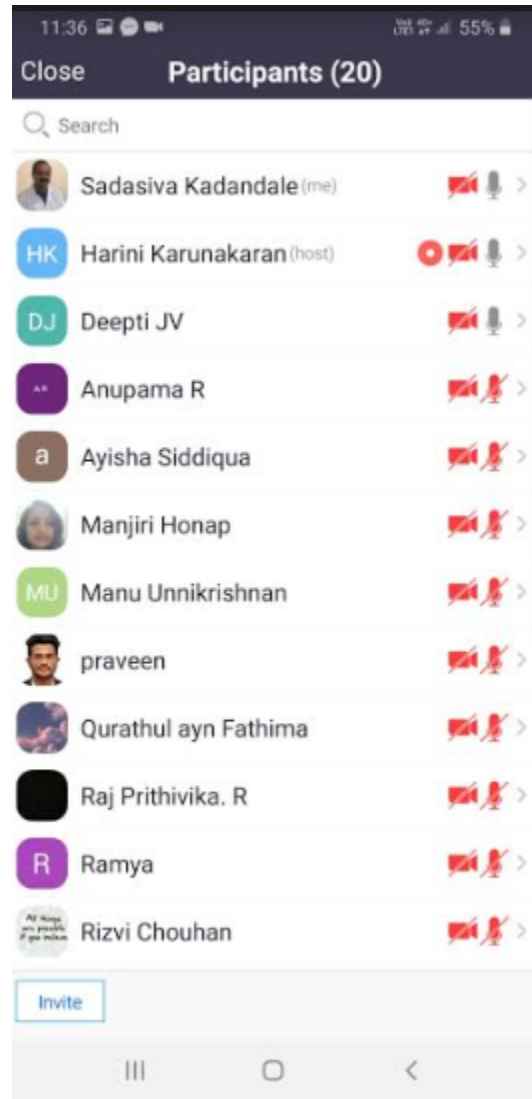

- Recall and Reassessment

Recent advances

- Ozone
- Laser remineralization
- Modifications of diet/life
