Definition:

Direct structural and functional connection between ordered lining bone and surface carrying implant.

Definition:

Direct structural and functional connection between ordered living bone and surface carrying implant.

The screenshot shows a web browser window with the address bar displaying a URL. The main content area contains the text "Definition:" followed by the definition of the term. On the right side of the browser window, there is a vertical strip showing a video call with three participants. The bottom right corner of the browser window features a yellow sticky note with the letter "C" and a blue puzzle piece icon.

Slide 10: Conclusion

DENTAL MANAGEMENT OF THE DIABETIC DENTAL PATIENT.

Dietary Consideration	Management	Education and Support of Patient
- Carbohydrate counting and glycemic index - Low glycemic index diet - Regular meal times and portion control - Avoidance of sugary drinks and snacks - Regular meal times and portion control - Avoidance of sugary drinks and snacks - Regular meal times and portion control - Avoidance of sugary drinks and snacks	- Preoperative and postoperative care - Regular dental visits and monitoring - Regular meal times and portion control - Avoidance of sugary drinks and snacks - Regular meal times and portion control - Avoidance of sugary drinks and snacks - Regular meal times and portion control - Avoidance of sugary drinks and snacks	- Regular meal times and portion control - Avoidance of sugary drinks and snacks - Regular meal times and portion control - Avoidance of sugary drinks and snacks - Regular meal times and portion control - Avoidance of sugary drinks and snacks - Regular meal times and portion control - Avoidance of sugary drinks and snacks
