6.	11/04/2020	Wire bending Retractors and Spring	Dr. Prema	7

DEPARTMENT OF ORTHODONTICS AND DENTOFACIAL ORTHOPAEDICS

E-LEARNING FOR THIRD YEARS

DATE	TOPIC	STAFF INCHARGE	PARTICIPANTS
06.04.2020	Labial bow	Dr.Prema	7

• It's modified form is used for midline diastema.

Reverse labial bow

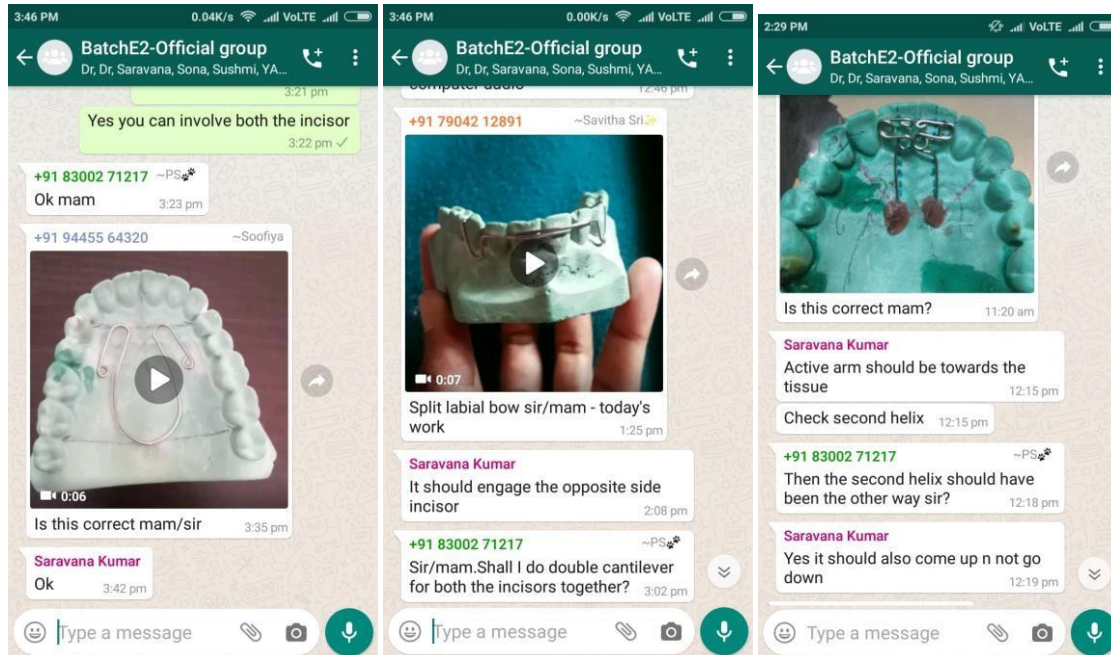

- Otherwise called reverse loop labial bow
- U loops are placed distal to canine and free ends of u loops are adapted occlusal between 1st premolar and canine
- Indication are similar to short labial bow.

Fitted labial bow

- The wire is adapted to confirm the contours of labial sure face.
- Used as retainers for completion of orthodontic appliances.

CRANKED SINGLE CANTILEVER SPRING

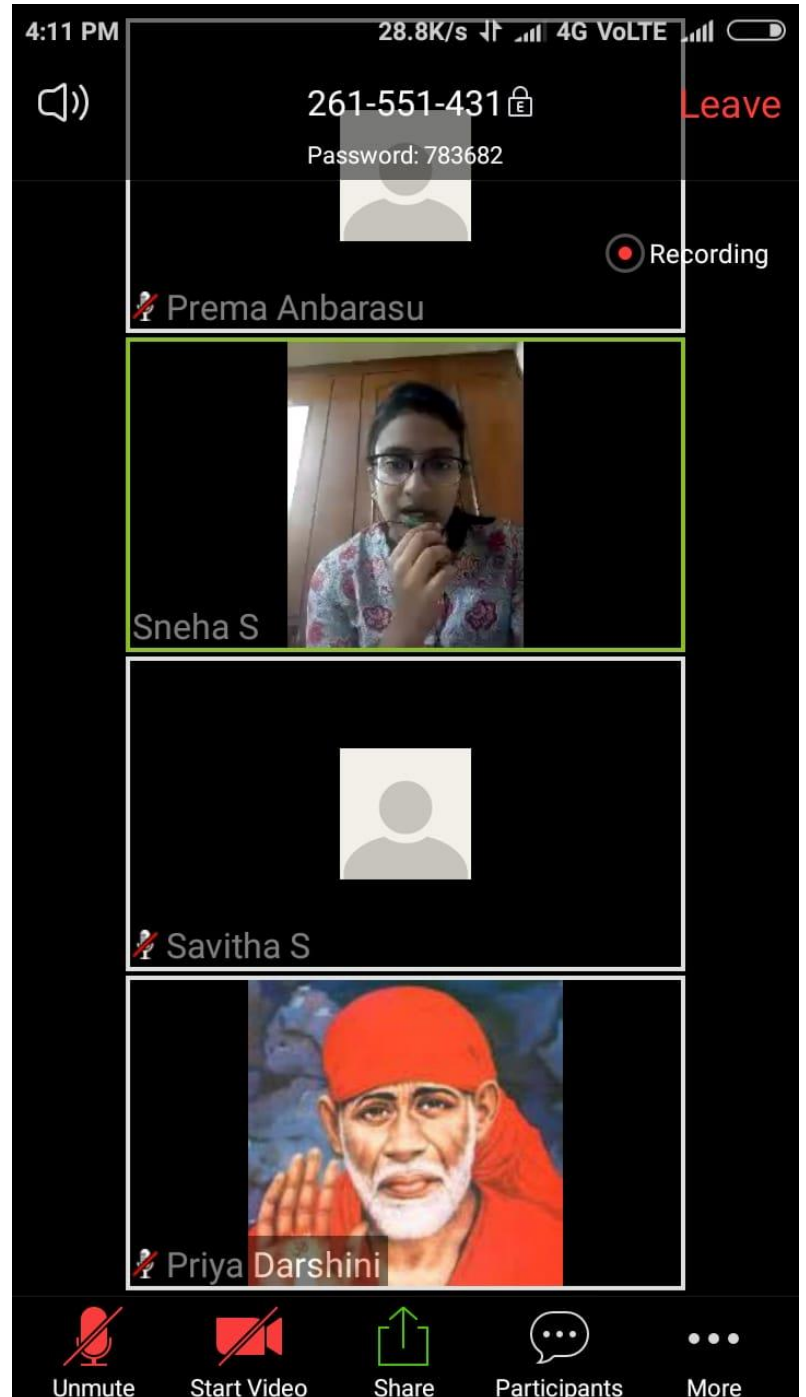

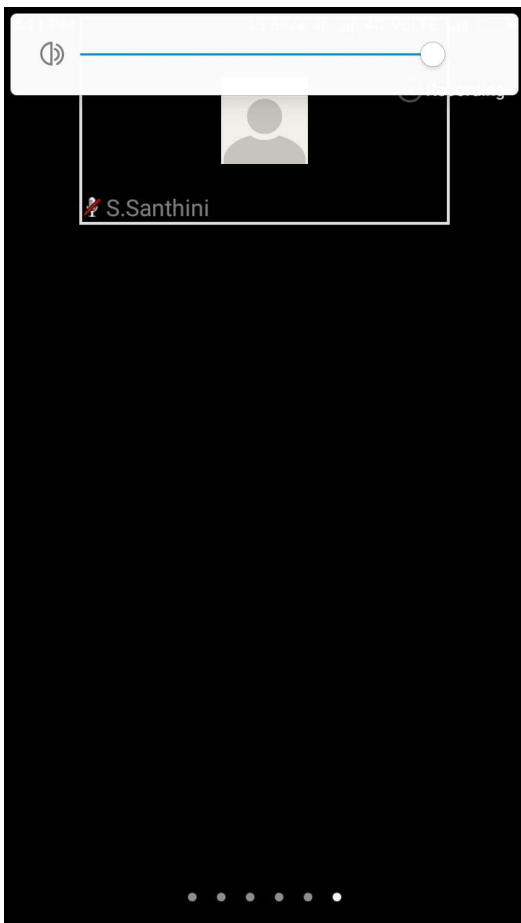

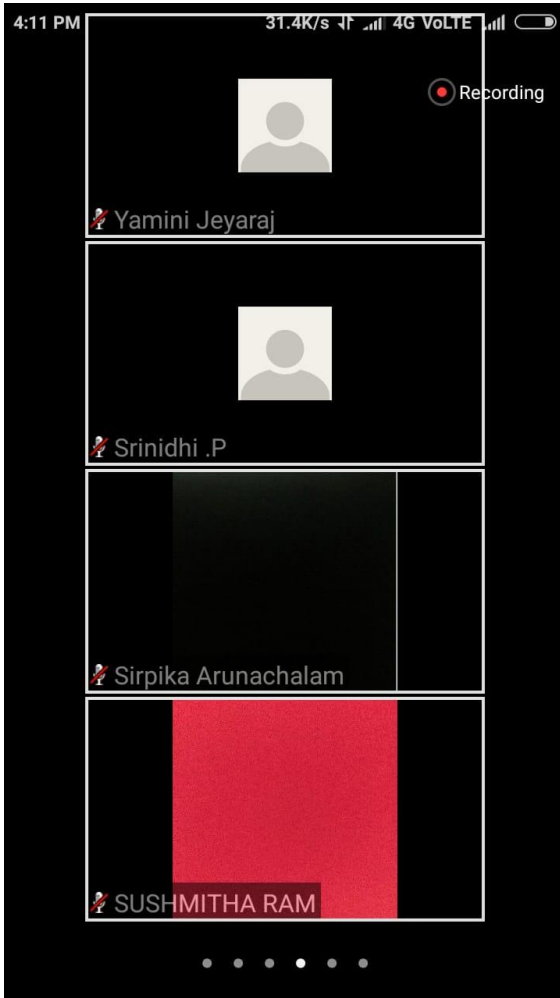

- It is constructed with 0.5mm wire
- The spring consists of a coil, close to the emergence from the base plate.
- The spring is cranked to keep it clear of the other teeth.
- USE:
- It is used to move teeth

THIRD YEAR BDS SEMINAR PRESENTATION

The screenshot displays a Zoom meeting interface. The top section shows a grid of 13 participants in a 4x4 layout. The participants are: Prema Anbarasu, Nivethitha Bhaskar, Srimathi Vishnu, SUSHMITHA RAM, Saravanakumar Subramanian, Yamini Jeyaraj, Savitha S, S. Santhini, Sirpika Arunachalam, Sona Sri, Soofiya Snober, and Shree devi Elangovan. The bottom left shows a list of participants with their names and status. The bottom right shows a presentation slide titled "RETRACTORS" with a list of bullet points: "can be used in shallow sulcus", "Activation: free end is cut by 1mm & readapted", and "Requires frequent adjustment". The slide also includes a diagram of a "Palatal Canine Retractor" and a list of bullet points: "canine placed palatally requiring distal buccal movement" and "coil of 3mm placed between the initial & final position of canine".

Participants (13)

- PA Prema Anbarasu
- S S. Santhini
- Nivethitha Bhaskar
- Saravanakumar Subramanian
- SS Savitha S
- Shree devi Elangovan
- Sirpika Arunachalam
- SS Sona Sri
- SS Soofiya Snober
- S Srinidhi .P
- SUSHMITHA RAM
- Y.J Yamini Jeyaraj

RETRACTORS

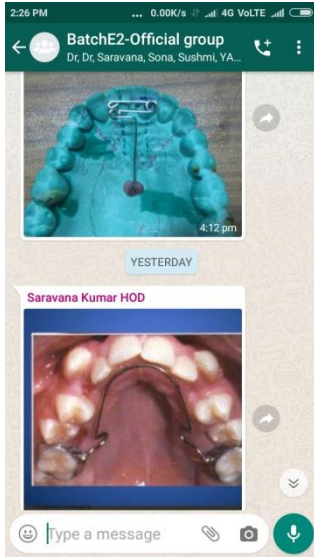

- can be used in shallow sulcus
- Activation: free end is cut by 1mm & readapted
- * Requires frequent adjustment

Palatal Canine Retractor

- canine placed palatally requiring distal buccal movement
- coil of 3mm placed between the initial & final position of canine
