## WHAT IS PULPOTOMY?

“Complete **removal of the coronal portion** of the dental pulp, followed by placement of a suitable dressing or medicament that will promote **healing and preserve the vitality** of the tooth” (Finn, 1985).

“Pulpotomy is defined as the **amputation of vital pulp from the coronal pulp chamber** followed by placement of a medicament over the radicular pulp stumps to **stimulate repair, fixation or mummification** of the remaining vital radicular pulp”. (Braham and Morris)
