Occlusion – Relationship of teeth with each other

Between teeth of same arch – Intra arch tooth alignment

Between teeth of opposite arch – Inter arch tooth alignment

Static

Many positions of the tooth contact when there is no food

- Centric
- Protrusive
- Right and Left lateral
- Intermediate

Dynamic

With food interposed

One of the many positions in the chewing cycle when teeth are almost contacting – influenced by

- TMJ
- Occlusal forms
- Occlusal plane
- Musculature
- Food consistency, tissue tolerance

Implant failure

Recording

- Implant failure is the first instance at which the performance of the implant, measured in some quantitative way falls below a specified and acceptable level.
- Implant failure is defined as the total failure of the implant to fulfill its purpose (functional, esthetic or phonetic) because of mechanical or biological reasons.

Implant failure is the inadequacy of the host tissue to establish or to maintain osseointegration
