Summary:

The camp was organized in collaboration with the department of Public Health Dentistry. The activities primarily involved dental screening and oral health education to the students, teaching and non-teaching staffs of Hindustan University. Dental screening was performed for oral cancer, red lesions and TMJ disorders.

Mass oral health education was provided by the Dr. Christeffi Mabel, Prof & HOD, who enlightened the crowd on the awareness, clinical presentation, treatment on various oro-facial disorders commonly seen and gave special emphasis on Temperomandibular disorders. It was an interactive session with the students who had various queries regarding different aspects of dentistry and the treatments available. The team was coordinated by Dr. R. Bhargavi, Senior lecturer, Dept of OMDR, along with CRIs. A total no of 43 cases (comprising of potentially malignant disorders, nutritional disorders and psychosomatic disorders) were diagnosed and patients were encouraged to visit the Department of Oral Medicine & Radiology to seek appropriate treatment .

Total	Male	Female	Special Cases
101	67	34	43
